SecureNASController Installation & Setup:

Preinstalled application:

1. .net desktop runtime-8.x.x-win-x64
[Download .NET 8.0 Desktop Runtime \(v8.0.20\) - Windows x64 Installer](#)

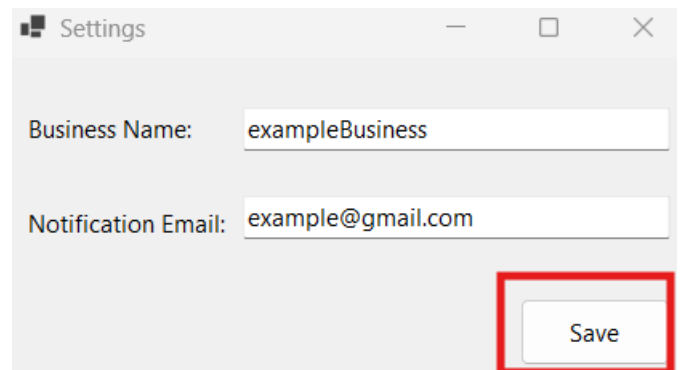

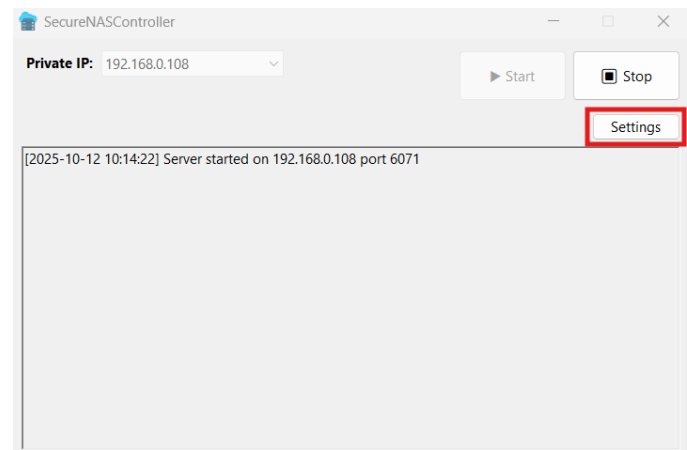

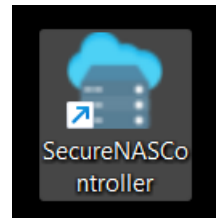

Installation Process:

1. Double-click the setup.exe or SecureNASController.msi file.
2. To install using the .exe file, both the .exe and .msi files must be in the same directory
3. Follow the on-screen prompts to complete the installation.
4. When prompted, accept the terms and continue through the standard installation steps.

Setup Process:

1. Open the SecureNASController application using the desktop shortcut.
2. Click on Settings
3. Input your business name and Notification alert email
4. Click save.

DCBackup Agent Client Installation & Setup:

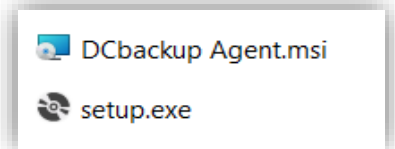

Preinstalled application:

1. .net desktop runtime-8.x.x-win-x64

[Download .NET 8.0 Desktop Runtime \(v8.0.20\) - Windows x64 Installer](#)

Installation Process:

1. Double-click the setup.exe or DCbackup Agent.msi file.
2. To install using the .exe file, both the .exe and .msi files must be in the same directory
3. Follow the on-screen prompts to complete the installation.
4. When prompted, accept the terms and continue through the standard installation steps.

Setup Process:

1. Goto "C:\Program Files\BNX Networks Inc\DCbackup Agent\DCbackup Agent.dll.config"
2. Copy it to somewhere else and open the copied one.
3. Change the value of serverPcName with your PC name where SecureNASController is installed.
4. Save and copy again
5. Paste & replace the DCbackup Agent.dll.config in the "C:\Program Files\BNX Networks Inc\DCbackup Agent\"
